

A beautifully simple js framework

Vue.js

Presented by: Max Vos

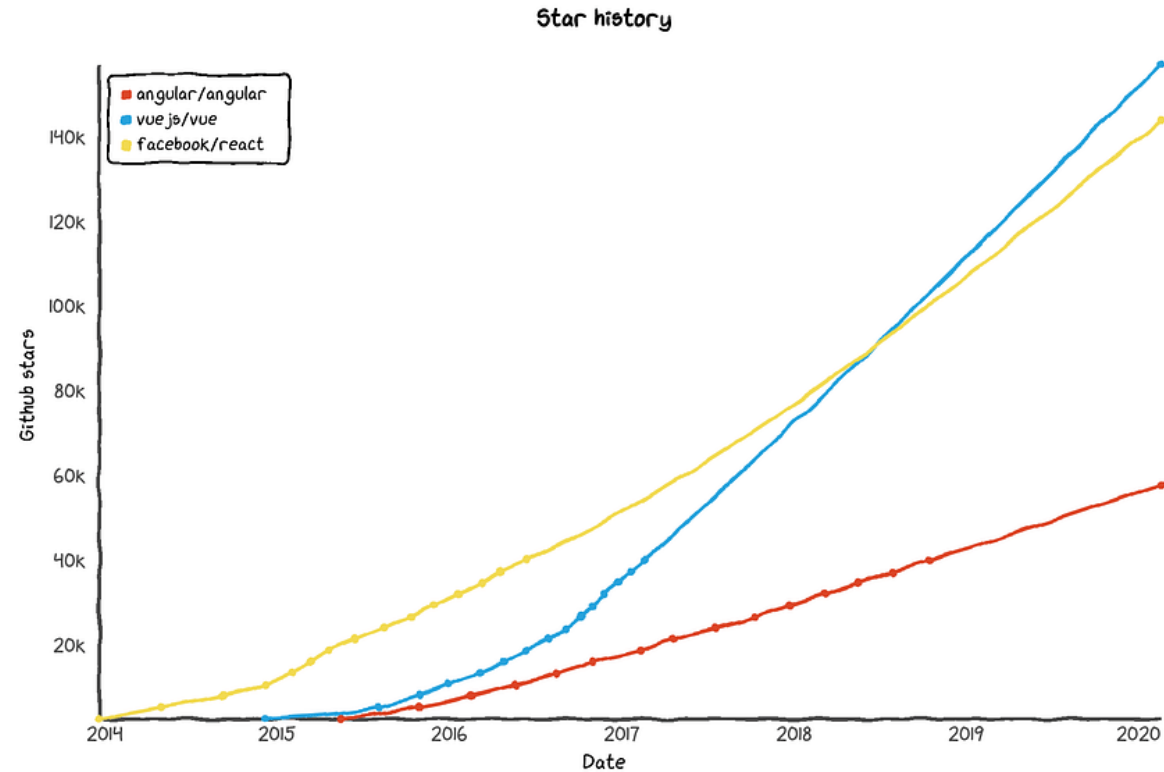

Overview

Little talking, lot of coding

- Putting it into perspective
- Why it's better than react and the other js frameworks 😊
- Something vue makes very easy
- Let's build an api consumer together

Putting it into perspective

Why it's better than react and the other js frameworks

Pros

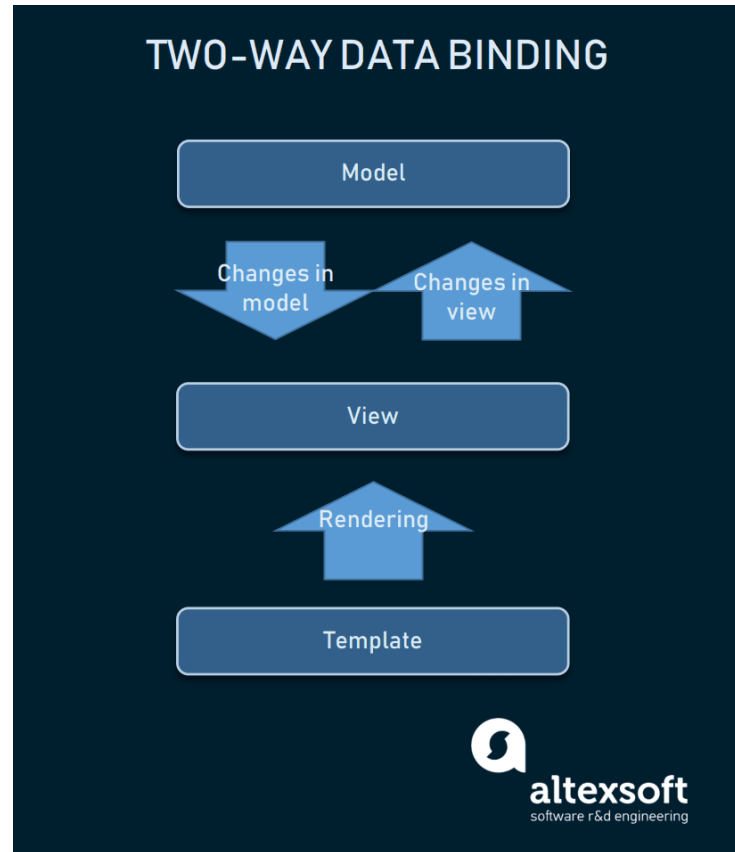

- Best documentation out there (even available in chinese)
- Easy to learn
- Late to the game, it picked the good parts of angular and react
- Tiny

Cons

- Risk of over flexibility

Something vue makes very easy

Let's build an api consumer together

- No styling, that will be done by Bastiaan
- No github api, we will use reqres.in
